Volumes of edema of lung tissue were measured in 29 patients with acute Legionnaires' disease to study the relationship between the extent of lung edema and pathophysiological changes such as blood pressure and chest X-ray findings. The edema volumes in all lung lobes tended to be greater than those in other lung diseases. In the first week, larger lung volumes were found in those with higher blood pressure and larger extent of chest X-ray changes; in addition, alve

It wasnt showing up in the properties. So I looked online for a solution. The thing that I ended up doing, was right clicking the project file, Properties and clicking the Build tab. I then clicked the Advanced button. In the Build Events tab I added the following lines: JAR MANIFEST ^(Check that the ManifestFileName property of the project file points to a file to use as the manifest for the generated JAR file.) "C:\Users\Kevin\Documents\Visual Studio 2017\Projects\App\App\bin\Debug\App.exe" ^(Adjust the above path if needed.) $(IntermediateOutputPath)App.exe I now want to run the build step again, but it will keep failing because the JAR MANIFEST line is missing the file name for 'App.exe' (which I'm assuming it can find during the
