Try using a local RSS feed or, even easier, just google the string. Ads by Google. A: NuGet is an Add-On for Visual Studio that helps to install any open source package in a Visual Studio project with a few mouse clicks. You can then view the NuGet packages in Visual Studio's packages browser. If you install a NuGet package to your

project it should provide an installation path on disk for example /packages or /packages-global if you add it to a VS project as a NuGet package reference. Visual Studio 2013 does not use NuGet but VS 2012 does. For VS 2015 you can use NuGet Package Manager to package and publish your code to a NuGet server that other developers can then install with the NuGet Package Manager extension to their VS solution.

For example: (may not be free) or free of charge (it has a search box you can fill in) Q: MYSQL and PHP comparison of datetime field I need to show the values of column "datetime" with "datetime1" or "datetime2" in the table1. The code i'm using: `$query = mysql_query("SELECT * FROM table1 WHERE datetime = '$datetime1.'" OR datetime2 = '$datetime1.'");`

```
if(mysql_num_rows($query) == 0) {  
    $query = mysql_query("SELECT *  
FROM table1 WHERE datetime1 =  
    '$datetime1.' OR datetime2 =  
        '$datetime1.'");  
if(mysql_num_rows($query) == 0) {  
    $query = mysql_query("SELECT *  
FROM table1 WHERE datetime1 =  
    '$datetime1.' OR datetime2 =  
        '$datetime1.'");  
if(mysql_num_rows($query) == 0)
```
