to quickly access all the options available. This utility enables you to backup all the data added to it, in an EABXBAK format, so as to be sure there will be no sudden data loss. Optionally, it is possible to append the current date and time to the filename. Contacts can be added and saved, along with information such as full name, company, department, business and home address, home and business phone number and e-mail. There are also some personal details that you might consider important to add, such as name of assistant, supervisor and spouse, birthday, hobbies, strengths, personality, photos (JPG, GIF, PNG, BMP, ICO, WMF) and even comments. It is possible to use a search function according to custom keywords and fields. Import and export is supported for CSV and HTML files, while spelling options can be tinkered with. For example, you can show spelling errors, automatically correct them and flag repeated words. With multi-language support, comprehensive Help contents (offline, online, daily tips) and a feature-rich environment, Efficient Address Book proves to be quite a useful piece of software. Response time is good and it does not put a strain on

manager. Efficient Address Book is a fast, powerful contact manager software program. 2 comments 1. This is not a new name in the store, but the company is small and it is hard to find good, reputable brands and prices. 2. Don't buy the software if it doesn't come with a standard format EABXBAK. Many of the other vendors you can get for free. 3. I think you can get 2 different sizes for the software, a fat (huge) one (in excess of 100mb) and a slim one (under 25mb). The only issue is that you might have to install the program onto 2 computers, one with the fat version and one with the slim version, but it will probably still be cheaper to just buy the slim one and have the larger one just for when you need to use the program's email export functionality. I recommend you go to [Fastmail.fm](http://Fastmail.fm) to check out the different emailing packages and you might find that for your needs they come with a EABXBAK file ready for import. This software also comes with all sorts of other useful features. For example, if you have a business you can add a legal or business address, business phone number and business web site, which all have different fields to add the name, position,

email, number, address, etc. of the person or business. You can create a business e-mail address and forward all emails to this, so you can forget about having to keep a register of every single business contact you have. You can add photos to contacts and calendars, and have it play your own music, and I've never once had any problems using it. I highly recommend it, you get to use the program free for 30 days, then you pay \$7.95 per month or \$25.95 per year, but you can get the whole package for \$37.95. It's one of the best contacts management programs I have ever used. Graduation isn't just a milestone. It can be a chance to get a job! A resume is your ticket to the job you want. It shows that you can be a valuable part of a team, and know how to work. However, it is 77a5ca646e
