Testimonials 4 / 5 by glenn on 07/09/2017 Good idea. Keeps repeating itself with no option to stop it. 5 / 5 by laura on 03/09/2017 This is useful for people with dyslexia or near sightedness. Good for people who have trouble reading comics 4 / 5 by Joe on 01/09/2017 Very nice when you're working on a rather simple design of a word or name. Great interface for someone who doesn't want to spend much time researching characters. 5 / 5 by nutimany on 22/08/2017 Nice design Works for me 5 / 5 by M-Hunter on 19/07/2017 so great! great app just like the author wrote:> A great tool! 5 / 5 by Ashe on 19/05/2017 This is a nice little tool for checking up on what you may have been using before. I found it really useful when I was writing my dissertation. I guess it is kind of like a cheat sheet for the main characters and symbols, but I like it when I can just check it from time to time and not have to worry about anything else. I love this app 5 / 5 by Cyla on 18/04/2017 I love this app I was actually surprised I loved it! It works great for people with

dyslexia. Efficacy and Safety of Combination of All-trans-Retinoic Acid and Flavonoids on Psoriasis: A Meta-analysis. Purpose The purpose of this study was to investigate the efficacy and safety of all-trans retinoic acid (ATRA) combined with flavonoids in the treatment of psoriasis. Methods PubMed, EMBASE and Cochrane Library databases were searched. We systematically retrieved trials on ATRA combined with flavonoids in the treatment of psoriasis. We evaluated the outcomes of skin lesions, PASI, and ALT by meta

You have an old typewriter, where everything is a little too small. Typing the same documents for years on end, you like the feel of the keys on the right as you need them, not the ones on the left. You are more interested in seeing the results of your work, not in being at the computer when you have a real job to do. Features:

- Create a list of symbols, or copy text in any program
- Convert text to symbols, decimal numbers, hexadecimal numbers, octal numbers, or binary numbers
- Choose a font type, font size, shadow and outline
- Choose a symbol type, that is: "Bold", "Oblique", "Block", "Bullet", "Back color", "Italic", "Underline", "Strikethrough", "Superscript", "Subscript", "Number style", "Letter style", "Alignment", "Vertical", "Horizontal", "Size", "Offset", "Font style", "Font color"
- View all characters at a time, or convert all of them in one go
- Copy symbols to the clipboard, and choose your favorite application
- Choose one of the character sets
- Find an image in the currently selected font
- Create a new character map, or a list
- Use the margin to change font sizes
- Turn the visibility of the dialog box on or off
- Use the shortcut keys (by default) to change the font size
- Make the font size as big or small as you need
- Use the formatting toolbar to change the font type, font size, shadow, outline, and color
- Use the calculator to change the decimal, hexadecimal, octal, and binary numbers to the selected font
- Show the unicode or the character codes
- Change the background color, text color, and foreground color
- Just drag your fingers across the screen to move the text preview
