FIFA 22 also introduces a brand new ball physics engine. The ball reacts to the pace of the player by changing behaviour, with rebounds, shots, drag and spin depending on the player's style of play and the type of surface the player is playing on. "EA SPORTS takes a lot of care to put the player in the environment," said Ian Darke,

ESPN FC Football Analyst. "At the moment, I'm playing on a pitch that's fully covered in mud, and the ball bounces up a couple of times, but I can't do anything with it. "But if I'm playing on a pitch that's slick, I can go through the mud without any issues."

"We have a really exciting product which encompasses all of the elements of what you do on the pitch." FIFA 22 features authentic, award-winning match engine including new camera modes to further immerse players in the action. Season modes include The Journey, Team of the

Year and the brand new FIFA Moments, a round-up of the story of the game. Multiplayer sees new online modes with co-op team creation and features including coach control, pass and shoot AI and the return of the

Crew Duel, which requires players to play 10 touches together. In addition to online modes, FIFA 22 introduces a new co-op mode, where players control the same player in a fully dynamic, free-running game mode. It also has new and upgraded player, coach and manager customization options. EA SPORTS FIFA 18 is an authentic football experience like no other. The new Pitch Awareness enables the next generation of EA SPORTS FIFA gameplay as players are prompted to make informed decisions, whether it's catching a ball into a gap or clearing an attack in one touch. In-game intelligence also allows players to anticipate the next move in a dynamic, unfolding game. Enhanced Player Intelligence transfers the intelligence of more than 20 real-world players into the controller to create authentic-style match-day reactions. This year's FIFA Ultimate Team

additions include the likes of Toni Kroos, Eden Hazard and Henrikh Mkhitaryan, giving players increased depth in leagues and countries around the world. It will be interesting to see how the new game modes evolve with the introduction of new gameplay additions such as hyper-speed motion-capture gameplay and the
