An 8-bit kart racing game made using the Unity engine by Southern Pixel, a small studio based in New Zealand. Players assume the role of an 8-bit animated kart racing across multiple courses on a range of islands. Simple gameplay, cute characters, and lots of different karts make SAB easy to pick up and fun to master. The game is available for PC, Mac, and Linux. Appropriate analysis of essential oils is an important part of their identification. The characterization of essential oil hydrolysates, mainly obtained by microwave assisted hydrolysis, is still a challenge, particularly because of the complexity of the hydrolysate mixture. This study presents a rapid and selective chromatographic method for the characterization of the major components in essential oil hydrolysates. Essential oils were first separated on a polystyrene-divinylbenzene column by capillary electrophoresis and then, based on eluting order, further separated on a short (1 cm) PVA-coated (8 microm id) polyethylene glycol column by capillary electrophoresis coupled with tandem mass spectrometry. The method was validated and applied to 24 essential oil hydrolysates. Limits of detection were 0.02-0.6% and 0.16-0.78% for the major and minor components, respectively.Q: get value of element from another function I'm trying to get the value of a element from a function, that's loaded through AJAX. A Close Combat of the highest order! The XVIIIth century has reached it's twilight, and with the onset of the XXth century, a new breed of weapons has arrived. Tossed back and forth between two equally deadly factions, a conflict of unmatched lethality has been born! With devastating weapons of modern science, the ground troops have been turned into an army of the dead! Whether it is ground based, aerial or space travel, the common denominator is the power of your weapons, and those who wield them. With the introduction of the space technology, the war takes place in a different dimension, in the vastness of space, and the ships are no longer the only ones to fight and die. The air fleets of the Aerial and Ground Forces are now joined by a new breed of war machines, the "Andes", each with their own unique weapons arsenal. The new weapons of the past have become the tools of future weapons! [Playable character types] - Ground crew: With the support of both the ground and aerial forces, your progress on this new battlefield depends on your skills. Stay vigilant to survive. - Aircrew: The specialized units of both ground and aerial forces; you must lend your own weapons and skills to them. It's up to you whether you'll be the champions of the ground crew or the aircrew. - Artillery: The one who makes the enemy bring their artillery out of the hideout is the power of your guns. With a direct hit and big shot, the enemy must deliver their full artillery force to deal with your attack. [Objective system] The objective system is designed with three primary factors in mind: - Easy to understand objectives - Gamers being able to choose the order of the objectives if required - A weapon system that can be hard to beat Every weapon in the game is set up as one of the following: - A "weapon" - A "projectile" - A "bullet" - A "fragment" Each of these objects has a different effect when it hits something. Enemies will be effected differently depending on the object that hit them. You will need to pay close attention to the weapon's object type to decide where to shoot and when to shoot. When you are firing a gun, you can change the angle at which the weapon fires from vertical to horizontal. This will greatly affect the way you fire the gun. There is also a "fire mode c9d1549cdd

An adventure focused on exploration and puzzle-solving set in a surreal dreamscape. Explore colorful worlds and meet fantastic characters. Crush vines, fall through puzzling holes, and defeat obstacles in your path. The main game is the "Hyrule Fantasy Land" that starts the adventure with a mini-puzzler. Each world has a little puzzle to play. Also, the maze of puzzles, some more obvious and others challenging, is the core of the gameplay. The plot is driven by a story told through a series of chapters, each with a slightly different idea. Everybody knows games are good for your brain. For a long time, the idea of cross-training with exercise has been confined to trying to balance your brain with your body. For decades, the fitness movement has claimed that this combined training is the key to good fitness and good brain performance. The LARP (live action role-playing game) allows for a mix of gaming and live action. What that means is that a player or group of players can come together to try to find a hidden person or some other goal. If they succeed, then they win. Once, many years ago, the internet was a place to swap secrets and knowledge. But if you are old enough you will remember the birth of Google. For those of you that are too young to remember, then this story is for you. In the beginning, there was the internet. And it was a very small thing. Just one page. Don't forget to leave a comment with the same or a better video idea. Don't forget to subscribe and share this channel.
