And great job on the soundtrack. That stuff always makes the soundtrack especially good when compared to not very good games. The dopaminergic function in the brains of mesencephalic tegmentum of rats was evaluated by measuring the accumulation of 3H-dopamine and 3H-spiperone in homogenates of the tissue. It was shown that the administration of L-dopa or levodopa in a dose of 100 mg/kg significantly increased the accumulation of 3H-dopamine in the homogenates of the tissues of the brain. The combination of L-dopa with either non-selective D1 receptor antagonist SCH 23390 or D2 receptor antagonist sulpiride in a dose of 2 mg/kg did not change the character of the L-dopa-induced increase in 3H-dopamine accumulation in the homogenates of the mesencephalic tegmentum. The same doses of the drugs combined with L-dopa did not change the character of the stimulant action of the latter. These data demonstrate that the pharmacological effect of L-dopa on the dopaminergic function in the brains of the mesencephalic tegmentum is realized via D1 and D2 receptors.Free Webcam Models & Webcam Sex Chat With our webcam chat site, you can find free webcam girls and webcam girls online.
