SBS Ground Control Crack +

An easy-to-use training administration system that streamlines the entire training lifecycle. It was designed with the training manager in mind. This program was designed for small companies that have to answer to the government or a quality and safety agency (ISO 9000, AS9100, TS16949). It streamlines management of the entire training lifecycle. It is designed to help you comply with the requirements of ISO 9000, AS9100, or TS16949 and other quality systems. You need to update it when you install an update to any of these standards. It helps you ensure your compliance to the changes made. It has a comprehensive yet flexible design which allows you to customize the program to your specific needs. It offers excellent support via phone, email, and live chat. It has extensive reporting features which allow you to see when training will be due, who did the training, when it was done, it's passed or failed, when the next scheduled training will be, or can be, it's which recertification date has been reached or exceeded. You can see by clicking on any of these records, it allows you to get detailed information on that record. This allows you to have a view of everything within the system to see who has been trained, what training has been done, when it was done and how you can use the training records to ensure compliance with all of your training and certification requirements. You can see and compare the usage of the skills for any position on the job. This will allow you to see what training and certification are needed for the position. You can customize the system with your own training, certifications, and job descriptions. Another benefit is that it can be configured to manage any electronic training or certification files. You can run reports on the current state of your job descriptions, certifications, and employee training to see that everything is set up according to the job description. Reports include: All Recertifications Due, All Recertifications Passed, All Recertifications Used, Training Due, Training Passed, Training Used, Training Recert, Certification Due, Certification Passed, Certification Used, Certification Recert. This will allow you to ensure that all your requirements are met and you are compliant. This is important as it prevents the government or your customer from giving you a bad review or penalty if the requirements were not met. Simple and straightforward reporting tools allow you to see who has been trained, when it was done, and

What's New in the?
