Kaito Yamazaki, the main character of the game, is a young adult delinquent with no future, who is getting mixed up in a lethal gang war between two rival neighborhoods in Nishinari-ku, in Osaka, Japan. His city is changed into a world of blood, gun and drugs, where the police are powerless and a gruesome crime wave breaks out. In order to get out of the corner he's been stuck in, he must use a gun to exact bloody revenge, righting all the wrongs he and his friends encountered throughout their life. Players will have to work through multiple story paths to overcome challenges and obstacles in order to accomplish their destiny. Key Features: ● A Deadly Jigsaw Puzzle of Branches and Guilt Players will have to navigate through a dynamic open world in order to solve the mystery of the Kaito gang's beef and uncover the truths hidden in their choice of dialogue and action paths, in order to know what really happened the night of the gang war and who the guilty one really is. ● An Open Playthrough, Unlimited Possibilities Every player can decide how they want to play through the game. If they want to play through each character's story line to the end, they can. If they want to skip the cut-scenes and focus on the gameplay, they can. If they want to make a different choice from the start than what was selected, they can. There is not one correct route to take in the game, not one correct ending to accomplish. The player can make choices and change paths at any time, meaning the player can decide the story as they play. ● Multiple Endings There are multiple endings for each character, so every choices made in the game has consequences. The story will be the same, but the outcome will be different for each player. ● A Free Style Action Game Unlike traditional RPGs, combat is not turn-based. Players can fight by their own timing to activate dialogue, or fire their guns in real time to attack enemies. ● A Crime Drama Cut Above Its Time The game is not a traditional crime drama. The player will be able to execute any of the numerous actions and words shown in the world. Words such as "Fire", "Gun", "Shoot", "Kill", and many more will trigger unique actions for the player's character and all their friends in the game. ● A World and Open Play For Everyone The game world is gigantic and filled with endless quests. Instead of my two years project because my friend is happy with the games, he called me to try my hand at programming a game for him. So the concept of Project on this game was to create a 2D shooter with infinite procedurally generated levels (like shooters) with physics. You can shoot through the environments, the bullets get more and more powerful. The trick is that you have to keep your distance from the background and you can shoot through some platforms (and the water) but you cant shoot at anything in the background.
