What It Does: The Gradient tool inside the Fill tool lets you apply color to any image with smooth transitions, creating a gradient. It can also create a blurred background. The Gradient tool allows you to take any path or selection and apply it to a rectangle (the gradient) in any color, or apply an existing gradient to that area. It can also be used to apply patterns to your images. Within the Gradient tool, the Fill tool allows you to apply any color to any solid area. It can be used to fill in background areas (like solid background or patterned backgrounds), to tint a solid area, or to apply additional pattern to a solid area. The Gradient tool can also be used to apply a muted version of a color to a solid area. You can also use the Gradient tool to apply a subtle color shift to a solid area. e3d0a04c9c
